📍 Lahore, Pakistan

ABOUT ME

Motivated Information Technology undergraduate with a strong passion for web development. Skilled in building clean, responsive websites with HTML, CSS, and JavaScript, and experienced in creating interactive front-end projects and WordPress sites. Eager to join a dynamic team where I can apply my skills and build high-quality, user-friendly web solutions.

PROJECTS

Personal Portfolio Website HTML, CSS, JS

A fully responsive personal portfolio with a hero section, about, services, and contact area, plus a navigation bar and social links — designed and built from scratch as a front-end developer.

ShopEase E-Commerce Website

A modern responsive e-commerce website built using HTML, CSS and JavaScript with product categories, search, shopping cart and responsive design

Game Zone Website

A responsive gaming website featuring multiple game categories, game details, and an engaging user interface. Built using HTML, CSS, and JavaScript with smooth navigation and interactive design.

Restaurant Website

Beautiful restaurant landing page with online reservation section.

JavaScript DOM Practice

Hands-on exercises covering DOM selection, events, and dynamic page manipulation while mastering core JavaScript.

University Portal

Student portal UI with dashboard, login and responsive pages.

Travel Website

Travel booking website with attractive UI and modern animations.

AREA OF INTEREST

Web Development -Front-end development, responsive UI design, and interactive websites built with clean, maintainable code.
